

A Whole New Way of Treating Cancer

Adventist Health
St. Helena
Martin-O'Neil Cancer Center

The Martin-O'Neil Cancer Center is an advanced cancer center located on the Adventist Health St. Helena Medical Center campus.

The Center is staffed by an experienced team of Medical and Radiation Oncologists and other cancer subspecialists who collaborate on the best treatment plan for each patient. Chemotherapy, radiation treatments and integrative support services are all offered at a single, modern facility for your comfort and convenience.

The Center is affiliated with the University of California San Francisco (UCSF) for clinical trials. Access to referral and second opinion support is available at UCSF, Stanford and other nationally- recognized cancer programs. The Martin-O'Neil Cancer Center can partner with these centers to provide your care. Presentation of each patient case at Tumor Board assures a multidisciplinary review of patient care plan options.

SERVICES OFFERED INCLUDE

- Clinical Trials through UCSF affiliation
- Oncology Certified Clinical Care Navigator
- Oncology Certified Registered Dietician
- On-site pharmacist for consultation
- Radiation treatment including Varian Linear Accelerator
- Calypso Medical Technologies for precision radiation treatment of prostate cancer
- On-site lab services
- Lymphedema and Physical Therapy treatment
- Genetic screening and counseling
- Patient Resource Room and Resource Specialist
- Full Range of Integrative Cancer Services

Our Team

ARI UMUTYAN, MD **Medical Director, Medical Oncologist**

Ari Umutyán, MD, medical oncologist and a long-time Napa County physician who is board certified by the American Board of Internal Medicine in medical oncology, has joined the Martin-O'Neil Cancer Center as medical director.

Bringing more than a decade of cancer-fighting expertise to his practice, Dr. Umutyán provides comprehensive and compassionate cancer care. He is dedicated to educating patients about

their condition in order to inspire a greater understanding and involvement in their care.

Dr. Umutyán received his medical degree from the University of Southern California Keck School of Medicine in Los Angeles. He completed his internal medicine internship and residency at University of California Davis Medical Center in Sacramento, where he also served as an internal medicine chief resident for one year while exploring his passion for teaching. He completed his fellowship in medical oncology and hematology at the University of California Davis Medical Center.

ETHAN D. SCHRAM, MD **Medical Oncologist & Hematologist**

Dr. Schram received his medical degree from University of California, Davis in 2003. He completed his residency in Internal Medicine at Oregon Health & Science University and a Fellowship in Hematology/Oncology at Scripps Clinic and Research Foundation where he was Chief Fellow.

Prior to joining the Martin-O'Neil Cancer Center, he was a Medical Oncologist at East Bay Medical

Oncology-Hematology Associates.

He is Board-Certified in Oncology, Hematology and Internal Medicine and his recognitions include the Scripps Health Nell and Tom Waltz Award for Leadership in Medicine and the Northwestern University Lynn Sage Breast Cancer Achievement Award. Dr. Schram earned his undergraduate degree from Wesleyan and Columbia Universities.

NORMA MEDINA, ANP-BC, AOCNP **Nurse Practitioner**

Norma Medina is an oncology board certified nurse practitioner who provides patient care in collaboration with our physicians. She provides education regarding the patient's individualized treatment plan, symptom management visits and equips patients with the necessary tools for healthy living and long term survivorship care beyond treatment.

DAVID TATE, MD **Radiation Oncologist**

Dr. Tate attended University of Virginia, where he received his BA with high distinction in 1987 and medical degree in 1991. Following internship, he completed his residency training in Radiation Oncology at Stanford University in 1995. Dr. Tate joined the faculty as an Assistant Professor at Stanford from 1995 through 1999, where his clinical and research interests included treatment techniques such as

stereotactic radiosurgery, brachytherapy and intensity modulated radiation therapy. He worked with Dr. Stephen Banks at Stanford for just over 3 years there.

Dr. Tate is Board-Certified in radiation oncology and has published articles in peer-reviewed journals on treatment of disease ranging from lymphoma to prostate cancer. He is particularly interested in targeted radiation therapy techniques which minimize side effects of treatment. Dr. Tate also has extensive experience in treatment of patients with combination of chemotherapy and radiation therapy. When asked why he chose Martin-O'Neil Cancer Center he said, "I am delighted to be at a cancer center of excellence, providing advanced treatment techniques, as well as a holistic approach to patient care."

STEPHEN J. M. BANKS, MD **Radiation Oncologist**

Dr. Banks is a Board-Certified Radiation oncologist. He received his medical degree from Stanford University in 1993, and then continued on at Stanford for his residency training in Radiation Oncology where he and Dr. David Tate worked together for over three years. In 1997, he joined Inova Alexandria Cancer Center, just outside Washington, D.C., as a Radiation Oncologist where he became

the Director of Brachytherapy and Medical Director of this American College of Surgeons accredited community cancer center. While practicing in Virginia, Dr. Banks specialized in treatment of men with prostate cancer, and was a co-founding member of the Prostate Brachytherapy Research Group. While practicing in the Washington, D.C. area, Washingtonian Magazine named him a Top Doctor for seven consecutive years.

He has personally performed more than 1200 prostate seed implants, and his results have been presented at national meetings and published in peer-reviewed journals. He currently works on a national level as a proctor training other physicians on how to perform prostate brachytherapy. In 2008, Dr. Banks and his family chose to return to California where he was recruited to develop a prostate cancer program by Redwood Regional Medical Group. Upon joining the Martin-O'Neil Cancer Center at St. Helena Hospital, he has been given the opportunity to realize a long time goal of developing a regional center of excellence for the management of prostate cancer. Dr. Banks is Board-Certified in Radiation Oncology.
