

Personalized support for individuals living with cancer

At Optum® Specialty Pharmacy, we provide much more than specialty medications. We offer resources, programs and clinical assistance that help people with cancer manage their therapy smoothly and with confidence.

Our experienced clinicians monitor patients' treatment while addressing questions and concerns and offering continuous support for medication administration and refills. And because we can intervene at critical support and decision points, we can provide patients and providers a comprehensive view that allows for informed, smart decisions.

Empowering patients and providers

Our programs and services go beyond the prescription to offer additional support:

Clinical management program — Pharmacists help drive positive therapeutic outcomes and savings through individualized education that promotes medication adherence and reduces the risk of side effects.

Live video consultations — Patients can video chat live with a specialty pharmacist for guidance on their treatment regimen, how to self-administer injections, and how to manage potential side effects.

Condition-specific videos — Patients are emailed videos that provide education, support and encouragement from others living with cancer.

Patient care packages — Patients receive a kit filled with helpful items like a journal, emergency medical card and calendar to help them stay organized, manage their treatment, and take their medication as prescribed.

Provider and patient portals — Secure web-based portals that give providers and their patients anytime access to important healthcare information.

Continuing education — Specialty pharmacists or nurses offer an ongoing series of presentations on the latest treatment and medication options.
